BUILDING GLOBAL INNOVATORS

About this Report

This report contains information regarding all programs and activities BGI has developed in 2020. The plethora of fields covered throughout this report will mention sectors namely Education, Acceleration and Open Innovation. Our involvement in all these sectors generates several different figures that are recorded annually and will be referred in this document. These statistics will include the number of participants per program, entrepreneurs, active ventures, revenues and capital raised, amongst others.

Technology-based ventures (as opposed to market-based or technology-enabled) require far more than just a viable business opportunity and funding in order to take off the ground. BGI is a transnational accelerator, based jointly in Lisbon, with operations in Cambridge, MA. It is now precisely eleven years from when we launched BGI with the MIT Portugal Program.

It is with great pleasure that we share, via this brief report, the latest information on our activity and active alumni.

Letter from the CEO - “Challenge of the Year”

2020 will be remembered as the year the world has suffered the impact of a modern pandemic, the largest after Europe's Black Death plague in the 14th century.

What started as isolated Covid-19 reports in late 2019, spread across the world at an astonishing speed reaching numbers never thought possible. This SARS-2 pandemic reminds us how fragile a human life is.

According to the World Bank, the Covid-19 crisis will cause a 5.2% contraction in GDP, the largest since 1870, and a historical 7% contraction in per capita income. GDP growth was at -7.6% in the EU in 2020, bringing higher unemployment and economic losses to businesses across most sectors. The fabric of the world economy is shifting, accelerating the need for digitisation. At the same time, this pandemic urges us to reflect on non-economic changes: the ozone hole has closed for the first time in 30 years! Biodiversity is reported to have recovered. Satellite images have shown dramatic improvements in air quality, as industry and transport shut down. After rising steadily for decades, global carbon dioxide emissions fell by 6.4%.

Were we living sustainably before? Were our policymakers prepared for such an outbreak? How should the economy of the “new normal” look like? How to accelerate the EU Green Deal implementation and carbon mitigation? Is the Covid-19 crisis a sign of a deceased or dying planet? Politicians around the world have a unique opportunity to tackle some of the biggest threats in human history – our own survival on planet Earth.

Let's not waste this chance. It may well be the last one we have. Let's all, together, unite to build a sustainable future for generations to come. In this 2020 report we highlight how our i-Danha Food Lab 3-year-old accelerator has become a recognised collaborative laboratory (food4sustainability.org recognised by FCT and ANI), that is now employing over 15 FTEs, and how BGI is increasingly committed to building global innovators in sustainable businesses across EIT KICs: Food, Climate, Health, Urban Mobility and Digital.

EIT Food RIS Fellowship

This program is dedicated to Master students and graduates from Portugal representing different scientific disciplines alongside food science. The students who want to take part have the possibility to join a host company outside the region of study or origin for three to six months. RIS Fellowships interns are provided with €1 350 scholarship per month.

EIT Food RIS Talents

This program is dedicated to doctoral students and postdocs from Portugal representing different scientific disciplines alongside food science. Students participate in innovation projects of EIT Food as well as in R&D projects by becoming involved in dedicated internships in the EIT Food partner organizations. RIS Talents interns are provided with €2 000 scholarship per month.

EIT Climate-KIC Journey

The Journey is a 4-week full time program focused on climate action, innovation, systems transformation, and community building. This summer school empowers students and professionals from around the world to be leaders and influencers of climate action. BGI is responsible for the entrepreneurial day, where students and EIT Climate-KIC startups can work together on finding solutions to tackle climate change challenges.

BGI Accelerator

Early stage startups

BGI Accelerator is a 10 year deep tech international accelerator, Spin out of MIT Portugal Entrepreneurship Initiative. The accelerator provides opportunities to deep tech startups (TRL > 4) via a SAFE venture financing, connecting innovators with global investors. BGI takes a 3% equity in a pre-money valuation over €3M. The acceleration program lasts 8 months and includes capacitation, mentorship and exclusive networking opportunities, followed by ad-hoc support.

Mature startups

BGI offers Business Development support to startups in two main verticals: sales and investment. This includes formulating the strategy, developing leads (selecting potential partners, investors and clients), scheduling meetings, tracking results and reformulating strategy. The key success factors of the BGI intermediation in the business development process is the large BGI network all around the globe as well as the usage of professional sales tools and methodologies.

Boston Global Immersion

Boston Global Immersion is a unique program, tailor-made exclusively for highly vetted, promising global technology-based scaleups. The aim is to scale to the USA via venture capital financing or new customer acquisition. Two intensive weeks of the program consisting of 1:1 meetings, contact with more than 50 investors and pitching at invitation-only events in one of the most dynamic entrepreneurial ecosystems in the world - Boston.

EIT Digital Venture Program

EIT Digital Venture Program is a competition for teams of entrepreneurs with strong value propositions and an existing prototype or proof of concept (PoC), which are eager to finalise a minimum viable product during an intensive eight-week pre-acceleration phase. The program operates in five regions and is delivered by selected EIT Digital innovation partners - Foundation Athens, Startup Wise Guys Tallin, BGI Lisbon and ABC Accelerator Ljubljana - each covering specific countries. The EIT Digital Venture Program supports early-stage teams from 19 countries in finalizing an MVP and starting a company. The program involves investment up to €15,000 and a 6-week pre-acceleration to help launching digital tech businesses in Portugal.

EIT Food EWA - Empowering Women in Agrifood

EWA - Empowering Women in Agrifood is an EIT Food program aimed at women from southern and eastern Europe with talent and passion for entrepreneurship in the agrifood sector. This program seeks to find innovative solutions that solve the problems faced by the food system, paying special attention to areas that have a low innovation rate or difficult access to other incubation or acceleration programs. For 6 months, 10 women entrepreneurs participate in an educational program adapted to the specific challenges of women in relation to entrepreneurship.

EIT Health Bridgehead

EIT Health Bridgehead program provides European startups and scale-ups with individualised support in growing their validated businesses beyond their home markets. During this process, startups are guided by members of the EIT Health's vetted European network of top-notch accelerators, who open the right doors to establish and grow cross-border business. Startups connect to one or more accelerators of their choice to receive support. The accelerators help startups speed access to markets, tap into local networks of partners and clients, access infrastructure and get a first-hand feel for the local regulatory and business contexts of new markets.

EIT Jumpstarter

EIT Jumpstarter, recognized as the 2019 Best Association Training Initiative in Europe, is one of the widest cross-industrial programs designed for early-stage innovators who want to gain traction and jumpstart their business. The 2020 edition was organised in collaboration with six knowledge and innovation communities: EIT Health, EIT Raw Materials, EIT Food, EIT InnoEnergy, EIT Manufacturing and EIT Urban Mobility, supported by the European Institute of Innovation and Technology (EIT). BGI organises national trainings for EIT Food and EIT Urban Mobility's startups.

EIT Food AgriFood Legal and Accounting

EIT Food AgriFood Legal and Accounting Support offers financial support for legal & accounting services to entrepreneurs and early-stage startups that are making the food system better for people's health and for the environment. EIT Food aims at this support helping entrepreneurs to register new companies, startups to better protect their IP and new and fair jobs to be created. BGI scouts Portuguese startups for this program.

EIT Food Test Farms

EIT Food Test Farms program is designed to link startups looking to validate their agricultural solutions with farmers or agricultural/pasture land to do a pilot project. Through enabling these links EIT Food supports innovative agritech ideas validating and testing their products and services, showcasing their business to customers and investors, and finally ensuring technological transformation in European agriculture. BGI scouts Portuguese startups for this program.

BioAll

BIO-All is an international project held in Portugal, Italy and Spain, which is designed to increase competence in health-related entrepreneurship. This innovative project is funded by the European Commission under the Erasmus+ program. The BIO-All Gear Box Accelerator is an international program aiming at boosting the creation of Portuguese, Spanish, and Italian seed-stage startups in the Biohealth related areas. The startups that participate may range from early-stage to functioning prototypes for the MedTech or terminated preclinical research for the Pharma area. Startups selected for the Bio-All Gear Box Accelerator will sign a SAFE with the consortium, given the startup winner will receive €5000.

Vodafone Power Lab

Vodafone Power Lab is an incubator created by Vodafone Portugal in 2009, devised to foster innovation and entrepreneurship. Designed to advance technology-based startups through incubation, mentorship, networking, and acceleration.

Each year Vodafone Power Lab receives hundreds of applications, Vodafone Power Lab connects with the entrepreneurial ecosystem by promoting initiatives. It has aided in the launch of more than 200 projects, many of which are now well-established startups and scale-ups. BGI supports Vodafone to cultivate innovation for the development of new products inside the business.

Expansion To Brazil

BGI is currently expanding its activities to Brazil, namely through acceleration and incubation of startups. In 2020, BGI developed an economical and sustainable viability research project to implement an innovation hub in state of Bahia. The aim of this activity is to identify innovative collaborations to solve challenges of the region. In 2021, BGI plans to accomplish a public-private partnership to create this innovation hub to support entrepreneurs and startups in the region.

Circular For Good

Circular4Good is a program supported by the Portuguese Ministry of Environment and Climate-Action that aims to support startups and SMEs working in the circular economy industry. The program seeks to find innovative circular economy solutions and support the scaling up of their business model and exploration of new strategies of circular economy. For 6 months, 10 startups participated in national bootcamps, networking events, mentorship program and in an immersion week in Boston, US.

LEME

LEME stands for Lisbon Ecosystem Monitoring Entrepreneurship system. It has provided a snapshot of the current Lisbon Entrepreneurial Ecosystem and relevant data to design a framework & respective methodology to track the progress of the entrepreneurial ecosystem over time. Based on the collected data, the monitoring system analyzed startups located in Lisbon, having socio-political-economic conclusions, and providing key information for policymakers and public entrepreneurship support agencies. This allowed a brainstorm of the main actor of the Lisbon innovation ecosystem to create initiatives for venture growth and value creation for a strategic and planned growth & sustainability of the ecosystem. All of this was possible since LEME ended up being a Showcase of metrics: revenues, jobs, knowledge creation, spillover effects, dissemination, sharing of good practices, role models, etc.

Food4Sustainability

BGI was awarded with a CoLAB Seal by the FCT, supported by the Portuguese government, for a circular, low-carbon food production system. Starting in September 2020 CoLab brought together institutions and companies to work on thematic issues related to advanced food production techniques with potential for carbon sequestration. The goal is to create a collaborative laboratory, where various technologies can be tested to improve food production processes in terms of CO₂ mitigation, zero use of artificial chemicals, environmental impact, and efficiency of the entire value chain.

EAT Circular

EAT Circular is a project sponsored by the EIT Climate-KIC that seeks to promote education and tools to manage resource flows in the "Circular Food Chain". This project aims to develop training sessions in Italy, Portugal, Slovenia, and Spain, to promote best practices in reducing food waste in collective food companies (e.g. canteens). EAT Circular started in November 2019 and has the goal of training public and private officers on strategies to reduce our "food print", which is the amount of food we waste.

EIT Food Government Executive Academy

EIT Food Government Executive Academy is a week-long training program that offers insights into challenges related to food system innovations and regulations. It is also an opportunity to exchange best practices that will contribute to further improvements of Smart Specialisation Strategies and inspire the future development of operational programs based on the EU Structural and Investment Funds. EIT Food Government Executive Academy (GEA) brings together government representatives from 13 countries with experts working in the field of agri-food innovations from industry, academia and European institutions.
